

MAXON CURRENT LEAD TIMES

Lead-Times for Specials Product

Lead-times on orders containing specials are subject to production capacity and material availability. When possible, the customer should order special products separately to avoid extended lead times for standard products. Extended lead times will be noted on the specials request.

****The options selected may extend product lead times.**

All published lead times are estimated production lead times and do not include transit time or fabric lead times. Large quantities of like product are subject to extended lead times.
